

Small Dog. Big Color.

Stella Color Sustainability Policy

August 20, 2014

At Stella Color, we believe it is our responsibility to engage in and promote more sustainable practices within our business and within our industry. We work with our employees, customers and suppliers to maximize the use of more environmentally- friendly materials and processes, and strive to provide a safe, healthy, and innovative place for our employees to earn a living. In support of these efforts we commit to the following practices.

We will:

Comply with all environmental, health and safety, and employment regulations, and implement and actively promote safe work practices and monitor activities to assure a safe and healthy environment for our employees and the community.

Foster a culture of continuous improvement in all of our business activities and push our environmental- and process-oriented initiatives beyond regulatory compliance.

Work to reduce or eliminate sources of pollution within our influence and control our waste stream, reducing its sources wherever possible, through better planning, process management and more efficient use of consumables.

Continually work to increase our use and reuse of production by-products as well as improve our recycling network, while also encouraging our customers and suppliers to take advantage of all available recycling resources, and to help develop better recycling solutions for the products they use or sell.

Maintain a disciplined management system to monitor and evaluate our progress, taking corrective action where necessary, and reporting on the status of our sustainability efforts annually.

Continue to share all goals and initiatives with all stakeholders including employees, customers, suppliers, and the community at large.
